## SUMMARY

Computer Science graduate passionate about software engineering, full-stack development, AI, and mobile applications. Experienced in building scalable software solutions and open-source developer tools

## EXPERIENCE

### Software Engineering Intern | Caredify

Feb 2026 - Jun 2026

Collaborated in a team to develop Caredify, a remote ECG monitoring and AI-assisted diagnosis platform. My primary responsibility was designing and developing the Flutter patient mobile application, including BLE communication with ECG devices, backend API integration, and real-time health monitoring.

### Competitive Programming Manager | CPC ISIMG

Sep 2024 - Feb 2026

Organized programming workshops and contests, mentored students in algorithms and problem-solving, and promoted collaborative learning within the competitive programming community.

## PROJECTS

### Caredify – AI Remote ECG Monitoring System

Feb 2026 - Jun 2026

Flutter • Node.js • Express.js • Render • BLE • MongoDB

Designed and developed a full-stack healthcare platform featuring a Flutter mobile application, Node.js backend, MongoDB database, BLE integration, and AI-powered ECG analysis for remote patient monitoring.

### KabaadHub

Flutter • Firebase • Dart

Developed KabaadHub, a production Flutter application for an Indian client, enabling users to buy, sell, and post recyclable waste. Successfully delivered the project, which is now available on Google Play Store.

### Mkarchi

Python • Pip • Next.js • Electron

Created an open-source software architecture generator available as a CLI, desktop application, and web platform, enabling automatic documentation and project structure analysis. Published on GitHub and PyPI.

## EDUCATION

### Bachelor's Degree in Computer Science | ISIMG

2023 - 2026

Bachelor's degree in Computer Science with a focus on software engineering, algorithms, databases, and modern software development.

### Baccalaureate in Computer Science | LRG

2022 - 2023

Graduated with Good (Bien) honors, building a strong foundation in computer science and mathematics.

## ADDITIONAL INFORMATION

- **Programming Languages:** Python • C++ • Java • Dart • JavaScript • TypeScript • PHP
- **Frameworks:** Flutter • Node.js • Express.js • Next.js • Electron • React • Symfony
- **Tools:** Git • GitHub • Firebase • MongoDB • Docker • Supabase • Godot
- **Languages:** English , French , Arabic
- **Certifications:** CodinGame C++ , HackerRank Problem Solving , HackerRank Python
- **Awards/Activities:** Participated in multiple national competitive programming contests, achieving strong rankings.
